Subject Index

Volume 9, 1987

Contributor index on p. 540.

Adenocarcinoma, cervical, prognostic significance of DNA ploidy and morphometric analysis, 17
Antigens, surface, study in cervicovaginal cells with simultaneous FCM DNA measurements, 419
Aspiration, fine needle (FNA)
  Renal cell carcinoma, FCM DNA analysis, 505
  Thyroid tumors, combined with FCM DNA analysis, 328
Astrocytoma, high-grade, ploidy of endothelium, 25
Automation of routine clinical chromosome analysis
  Karyotyping, 383
  Metaphase finding, 391
Autoradiography
  Computer-enhanced video microscopy radionuclide method, 291
  Quantitative, correlation to morphometry and cytometry, 115

Benzopyrene treatment of cervix in mice, nuclear DNA changes during, 411
Bone marrow, erythroblastic cells, quantitative analysis of normal maturation sequence, 253
Brain, high-grade astrocytomas, ploidy of endothelium, 25
Breast
  Cancer, computerized morphometric image analysis of nuclear parameters, 480
  Carcinoma
    Comparison of nuclear DNA from *in situ* and infiltrative components, 263
    DNA content related to clinical status, ER content and outcome, 429
    Quantitation of tissue ER content and histochemical staining by MicroTICAS system, 279
  Lesions, FCM DNA analysis in cytopunctures, 485
  Tumors, comparison of slide and flow DNA cytophotometry, 138

Cancer
  Breast, computerized morphometric image analysis of nuclear parameters, 480
  Cervix, CYBEST screening system, 448
  Cytophotometric DNA determination related to karyotype, 96
  Ovary, prognostic value of morphometric and DNA analyses, 287
Carcinogen treatment of mice cervices, nuclear DNA changes during, 411
Carcinoma
  Breast
    Comparison of nuclear DNA from *in situ* and infiltrative components, 263
    DNA content related to clinical stage, ER content and outcome, 429
    Quantitation of tissue ER content and histochemical staining by MicroTICAS system, 279
  Cervical squamous, nuclear DNA changes during pathogenesis in carcinogen-treated mice, 411
Lung, small cell
  DNA content as indicator of chemosensitivity, 425
  Image analysis differentiation from poorly differentiated epidermoid carcinoma, 499
  Nuclear DNA content, cytomorphologic features and clinical characteristics, 495
Renal cell
  FCM DNA analysis in aspirates and surgical samples, 505
  Karyometry and histometry, 182

Cell image analysis (*see* image analysis)

Cells
  Atypical sputum from preneoplastic lesions, diagnostic morphometric evaluation, 49
  Bone marrow erythroblastic, quantitative analysis of normal maturation sequence, 253
  Cervicovaginal, simultaneous FCM DNA and surface antigen analyses, 419
  Gynecologic, preparation of monolayers for automated cytology, 55
  Lymphoid
    Fourier analysis of nuclear and cytoplasmic shape in CLL, 475
    Morphometric quantitation of nuclear shape, 459, 469
  Measurement of features by automated cytology, 212
  Normal and virus-transformed, morphometric analysis of cell outlines, 315
  Scene segmentation, 197
  Tumor, relation of DNA cytophotometry to karyotyping, 96

0884-6812/87/0906-0542/$02.00/0 © The International Academy of Cytology

Visually normal intermediate in CIN, relationship of quantitative features to progression of the lesion, 405
Vulvar parakeratotic and dyskeratotic, structural and morphometric analysis, 243
Cerebral cortex, Poisson analysis of spatial distribution of neurons and glia, 531
Cervix
Adenocarcinoma, prognostic significance of DNA and morphometric analyses, 17
Cancer, CYBEST screening system, 449
Cells, simultaneous FCM DNA and surface antigen analyses, 419
Dysplasia, moderate, prognostic value of markers in routine smears, 165
Neoplasia, intraepithelial (CIN)
Relation of quantitative features of visually normal intermediate cells to progression of lesion, 405
Prediction of diagnosis groups by cell image analysis, 169
Squamous carcinoma, nuclear DNA changes during pathogenesis in carcinogen-treated mice, 411
Chemosensitivity, small cell carcinoma of lung, DNA content as indicator, 425
Chromatin texture in thyroid tumors, on-line TEM analysis, 268
Chromosome analysis
Automated karyotyping, 383
Automated metaphase location, 391
Evaluation of malignant glioma cultures, 435
Clustering, analysis of object, 303
Colon, analysis of adenomatous structures, 273
Contour, nuclear
Fourier analysis in CLL, 475
Quantitation in NHL, 459
Quantitation in lymphoid morphometry, 469
Cultures, malignant glioma cells, evaluation by FCM DNA and karyotyping analysis, 435
CYBEST
Model 2 cell dispersion and monolayer smearing system, 445
Model 4 CYBEST system for uterine cancer screening, 449
Cytochemistry (*see also* immunocytochemistry)
Preparation of specimens, 218
Cytology
Automated, 189
Historical perspective, 369
Measurement of cell features, 212
Preparation of monolayers of gynecologic cells for, 55
Quantitative, statistical detection of diagnostic clues, 355
Voided urine, comparison with DNA cytophotometry and image analysis, 398
Cytometry (*see also* cytophotometry, DNA analysis, FCM and microspectrophotometry)
Correlated to quantitative autoradiography, 115
Preparation of cell monolayers from paraffin-embedded tissue for, 225
System for combined static and flow, 375
Cytomorphology, preparation of cell monolayers from paraffin-embedded tissue for, 255
Cytophotometry, DNA/Feulgen
Breast tumors, comparison of slide and flow techniques, 138
Cancer cells, relation to karyotype, 96
GI smooth muscle tumors, 105
History of development, 2
Prestaining of membrane markers in tissue sections for selection of measurement areas, 323
Voided urine sediment, comparison with cytology and image analysis, 398
Cytopreparation
Monolayers
By CYBEST-CDMS, 445
From paraffin-embedded tissue, 225
Of gynecologic cells for auto-
Specimens for automated/analytical systems, 218
Cytopunctures, fine needle, of breast lesions, FCM DNA analysis, 485
DNA, absolute values determined by Feulgen microspectrophotometry and quantitative EM, 13
DNA ploidy analysis/content
Breast carcinoma/lesions/tumors
Comparison between *in situ* and infiltrative components, 263
Comparison of techniques, 138
FCM of benign and malignant, 485
Relation to clinical status, ER content and outcome, 429
Carcinogen-induced squamous cervical carcinoma in mice, changes during pathogenesis, 411
Cervical adenocarcinoma, prognostic significance, 17
Cervicovaginal cells, with simultaneous FCM surface antigen detection, 419
Endothelium in high-grade astrocytomas, 25
FCM evaluation of malignant glioma cultures, 435
History of development, 2
Human spermatozoa, microfluorometry, 232
Measurements in stratified tissue sections, microcomputer-based system for, 69
Ovarian cancer, prognostic value, 287
Preparation of specimens, 218
Small cell carcinoma of lung
Indicator of chemosensitivitv. 425
Related to cytomorphometric features and clinical prognosis, 495
Statistical discrimination of patterns, 60
Vulvar skin, microspectrophotometric, 239
Dimensions, distribution of measurements in cells, 341
Dysplasia, moderate cervical, predictive value of markers in routine smears, 165

Editorial, 189
Electron microscopy (EM)
Morphometric, 7
High-resolution of nuclear rings, 335
Quantitative, determination of absolute DNA values, 13
Transmission (TEM), on-line image analysis of chromatin texture in thyroid tumors, 268
Estrogen receptors (ERs) in breast carcinoma
Quantitation by MicroTICAS system, 279
Related to DNA content, clinical status and outcome, 429
Eye, melanoma, clinical application of morphometric measurements, 30

Fibroblasts, normal and virus-transformed, morphologic analysis of cell outlines, 315
Flow cytometer, imaging, development, 375
Flow cytometry (FCM)
DNA analysis
Benign and malignant breast lesions, 485
Breast tumors, comparison with slide cytophotometry, 138
Cervicovaginal cells, with simultaneous surface antigen analysis, 419
Evaluation of malignant glioma cultures, 435
Prostatic cancer, correlation with prognosis, 156
Renal cell carcinoma, comparison of results in aspirate and surgical specimen, 505
Thyroid tumors, combined with FNAB analysis, 328
DNA and RNA analysis, characterization of hematologic malignancies, 147
Fluorescence immunologic, study of hematologic malignancies, 133
Quantitative assessment of neutrophil function, 42
Fluorescence scanning microscope, fast laser, 509
Fourier analysis, nuclear and cytoplasmic shape in CLL, 475

Gastrointestinal (GI) tract, smooth muscle tumors, morphometry and DNA cytophotometry, 105
Glia, Poisson distribution analysis in human cortex, 531
Glioma, malignant cells in culture, evaluation by FCM and karyotyping, 435

Histochemistry, breast carcinoma tissue, quantitative analysis by MicroTICAS system, 279
Histology, automated, historical perspective, 369
Histometry, (*see also* image analysis)
Renal cell carcinoma, 182
Statistical, detection of diagnostic clues in, 355
Histopathology, analysis of adenomatous structures, 273

Image analysis, high resolution (*see also* histometry)
Application of small microcomputer to, 535
Atypical cells in sputum in preneoplastic lung lesions, 49
Bone marrow erythroblastic cell lineage, 253
Cervical moderate dysplasia, prognostic value in routine smears, 165
Cervical neoplasia, prediction of diagnostic groups, 169
Computerized morphometric, nuclear parameters in breast cancer, 480
Differentiation of poorly differentiated epidermoid and small cell carcinomas of lung, 499
Measurement of cell features, 212
On-line TEM, chromatin texture in thyroid tumors, 268
Preparation of cell monolayers from paraffin-embedded tissue, 225
Scene segmentation
Cells, 197
Tissue sections, 190
Systems (*see* CYBEST, Magiscan, MicroTICAS, SAMBA)
Visually normal intermediate cells in CIN, relation to progression of lesion, 405
Voided urine, comparison with DNA cytophotometry and cytology, 398
Immunocytochemistry, combined with morphometry, 123
Immunology, FCM, study of hematologic malignancies, 133
Indices, nuclear contour, morphometric quantitation
Lymphoid cells, 469
NHL, 459

Karyometry, renal cell carcinoma, 182
Karyotype, cancer cells, related to DNA cytophotometry, 96
Karyotyping
Automated chromosomal, 383
Evaluation of malignant glioma cultures, 435
Kidney, renal cell carcinoma
FCM DNA analysis in aspirates and surgical samples, 505
Karyometry and histometry, 182

Laser, fast fluorescence scanning microscope, 509
Leiomyoma and leiomyosarcoma, GI, morphometry and DNA cytophotometry, 105
Lesions
Breast, FCM DNA analysis in cytopunctures, 485
Hepatic nodular and vascular, morphometry, 39
Pulmonary preneoplastic, evaluation of morphometric markers in sputum specimens, 49
Vulvar, structural and morphometric analysis of exfoliated cells, 243
Leukemia
Chronic lymphocytic (CLL), Fourier analysis of nuclear and cytoplasmic shapes of lymphoid cells, 475
FCM characterization, 147
FCM and immunology, 133
Liver, nodular and vascular lesions, morphometry, 39
Lung
Preneoplastic lesions, evaluation of morphometric markers in sputum specimens, 49
Small cell carcinoma, DNA content

Indicator of chemosensitivity, 425
Related to cytomorphometric features and clinical characteristics, 495
Small cell and poorly differentiated carcinoma, image analysis distinction, 499
Lymphoma
FCM and immunology, 133
FCM characterization, 147
Non-Hodgkin's (NHL), quantitation of nuclear shape, 459

Magiscan 2, automation of routine clinical chromosome analysis
Karyotyping, 383
Metaphase location, 391
Malignancies, hematologic
Characterization by FCM, 147
FCM and immunology, 133
Markers
Cervical moderate dysplasia, predictive value in routine smears, 165
Membrane, prestaining in tissue sections for selection of areas for cytophotometry, 323
Morphometric, preneoplastic pulmonary in sputum, 49
Mass, distribution of measurements in cells, 341
Measurements, distribution of mass, volume and dimension in biology, 341
Melanoma, intraocular, clinical application of morphometric measurements, 30
Metaphase, automated location of, 391
Microcomputer
Application to cell image analysis, 535
System for quantitative analysis of stratified tissue sections, 69
Microfluorometry, DNA-DNP complex in human spermatozoa, 232
Microscope
Fast fluorescence laser scanning, design, 509
Video, computer-enhanced, for detection and localization of quantum-limited events, 291
Microspectrophotometry, Feulgen
Determination of absolute DNA values, 13
Nuclear DNA in vulvar skin, 239
MicroTICAS image analysis system
Karyometry and histometry of renal cell carcinoma, 182
Quantitation of ER content and histochemical staining in breast carcinoma, 279
-STRATEX for quantitative analysis of stratified tissue sections, 69
Monolayers, cellular, preparation for automated/anaytical cytology
Automation by CYBEST-CDMS device, 445
From aspirated and exfoliated specimens, 218
From paraffin-embedded tissue, 225
Of gynecologic cells, overview of techniques, 55
Morphometry, 1
Applications in tumor pathology, 79
Breast cancer, computerized image analysis of nuclear parameters, 480
Cervical adenocarcinoma, prognostic significance, 17
Clinical applications, statistical methods for, 30
Combined with immunocytochemistry, 123
Correlation with quantitative autoradiography, 115
Electron microscopic, 7
High-resolution of nuclear rings, 335
Fibroblastic cell outlines, 315
GI smooth-muscle tumors, 105
Hepatic nodular and vascular lesions, 39
Lymphoid cells
Fourier analysis of nuclear and cytoplasmic shape, 475
Nuclear shape indices, 459, 469
Ovarian cancer, prognostic value, 287
Potential role in surgical pathology, 455
Principles and clinical applications, 89
Pulmonary preneoplastic lesions, evaluation in sputum specimens, 49
Vulvar lesions, analysis of exfoliated cells, 243
Myeloma, FCM characterization, 147

Neoplasia, cervical intraepithelial (CIN)
Prediction of diagnostic groups by cell image analysis, 169
Relation of quantitative features in visually normal intermediate cells to progression of lesion, 405
Neurons, Poisson distribution analysis in human cortex, 531
Neutrophil, quantitative FCM assessment of function, 42
Nucleus
Breast cancer, computerized morphometric image analysis of parameters, 480
Lymphoid
Fourier analysis of shape, 475
Morphometric quantitation of shape, 459, 469
Rings, morphometry by high-resolution EM, 335
Roundness, correlation to prognosis in prostatic cancer, 156

Ovary, cancer, prognostic value of morphometry and DNA analysis, 287

Pathology
Quantitative, principles and clinical applications, 89
Surgical, potential role of morphometry, 455
Tumors, application of morphometry, 79
Ploidy (*see* DNA ploidy)
Poisson distribution, analysis of spacing of neurons and glia in human cortex, 531
Polyomavirus-transformed fibroblasts, morphometric analysis of cell outlines, 315
Prognosis (*see also* DNA ploidy)
Ovarian cancer, value of DNA and morphometric analysis, 287
Prostatic cancer, correlation to nuclear roundness and FCM light scatter, 156

Small cell carcinoma of lung, relation to nuclear DNA content and cytomorphologic features, 495

Radionuclides, cells and tissues, detection and localization by computer-enhanced video microscopy, 291
Rings, nuclear, morphometry by high-resolution EM, 335

SAMBA 200 Cell Image Processor, quantitative analysis of normal bone marrow erythroblastic lineage, 253
Scanning, high-speed, fluorescence laser microscope for, 509
Scene segmentation
  Cells, 197
  Tissue sections, 190
Shape
  Normal and virus-transformed fibroblasts, morphometric analysis, 315
  Nuclear
    Correlation to prognosis in prostatic cancer, 156
    Quantitation in NHL, 459
    Quantitation in lymphoid morphometry, 469
  Nuclear and cytoplasmic, Fourier analysis in CLL, 475
Skin, vulvar, DNA microspectrophotometry, 239
Smears, routine Papanicolaou, prognostic value of markers in moderate dysplasia, 165
Spermatozoa, human, microfluorometric assessment of DNA-DNP complex, 232
Sputum, preneoplastic lung lesions, diagnostic evaluation of atypical cells by high-resolution image analysis, 49
Stains, calibration, standard specimens for, 521
Statistics
  Analysis of object clustering, 303
  Detection of diagnostic clues in quantitative cytology and histopathology, 355
  Order, use in discrimination of ploidy patterns, 60
  Use in practical clinical application of morphometric measurements, 30
Structures, adenomatous, analysis in histopathology, 273

Thyroid, tumors
  Combined use of FNAB and FCM DNA studies, 328
  On-line TEM image analysis of chromatin texture, 268
Tissue
  Paraffin-embedded, preparation of cell monolayers from, 225
  Sections
    Breast cancer, quantitation of ER content and histochemical staining by MicroTICAS system, 279
    Cytophotometry, prestaining of membrane markers for selection of areas to measure, 323
  Renal cell carcinoma, karyometry and histometry, 182
  Scene segmentation in, 190
  Stratified, MicroTICAS system for quantitative analysis, 69
Tumors
  Breast, comparison of slide and flow DNA cytophotometry, 138
  GI smooth-muscle, morphometry and DNA cytophotometry, 105
  Morphometric histopathology, 79
  Thyroid
    Combined use of FNAB and FCM DNA studies, 328
    On-line TEM image analysis of chromatin texture, 268

Urine sediment, DNA cytophotometry, comparison with cytology and image analysis, 398

Video microscopy, computer enhanced, detection and localization of quantum-limited events of radionuclide-labeled specimens, 291
Volume, distribution of measurements in cells, 341
Vulva
  Lesions, structural and morphometric analysis of exfoliated cells, 243
  Skin, DNA microspectrophotometry, 239

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION (Required by 39 U.S.C. 3685). 1A. Title of Publication: Analytical and Quantitative Cytology and Histology. 1B. Publication number: 08846812. 2. Date of filing: October 30, 1987. 3. Frequency of issue: Bimonthly. 3A. No. of issues published annually: 6. 3B. Annual subscription price: $90.00. 4. Complete mailing address of known office of publication: P.O. Drawer 12425, 8342 Olive Boulevard, St. Louis, MO 63132. 5. Complete mailing address of the headquarters or general business offices of the publisher: Same as 4. 6. Full names and complete mailing address of publisher, editor, and managing editor: Publisher—Science Printers and Publishers, Inc., P.O. Drawer 12425, 8342 Olive Boulevard, St. Louis, MO 63132; Editor—George L. Wied, M.D., 8342 Olive Boulevard, St. Louis, MO 63132; Managing editor—None. 7. Owner: The International Academy of Cytology, P.O. Drawer 12425, 8342 Olive Boulevard, St. Louis, MO 63132. 8. Known bondholders, mortgagees and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities: None. 9. Not applicable to Science Printers and Publishers, Inc.

Extent and nature of circulation	*Average number of copies each issue during preceding 12 months*	*Actual number of copies of single issue published nearest to filing date*
A. Total number of copies printed *(net press run)*	3,000	3,000
B. Paid and/or requested circulation		
1. Sales through dealers and carriers, street vendors and counter sales	0	0
2. Mail subscription (paid and/or requested)	2,441	2,458
C. Total paid and/or requested circulation *(Sum of 10B1 and 10B2)*	2,441	2,458
D. Free distribution by mail, carrier or other means, samples, complimentary and other free copies	0	0
E. Total distribution *(Sum of C and D)*	2,441	2,458
F. Copies not distributed		
1. Office use, left over, unaccounted, spoiled after printing	559	542
2. Returns from news agents	0	0
G. Total *(Sum of E, F1 and F2—should equal net press run shown in A)*	3,000	3,000

11. I certify that the statements made by me above are correct and complete.

Donna Kessel, *Publisher*
